

一 朗读作业 （速读背诵并录音上传下面句子）

American energy crisis has turned into a political one over government failure to stop the dollar from going into free-fall.

二 书面作业

阅读

A

On my first day of high school , I asked an eleventh-grader where my class was. And he told me it was "on the fourth floor, next to the pool. "I found out five minutes later that we don't even have a fourth floor and there's no pool either! Besides that, I didn't have any trouble with the older kid.

I think the biggest difference between middle and high school is the homework load （工作量） and size of the school . I went from maybe fifteen minutes of homework a night to several hours, so I had to learn how to make full use of time! Our class size is around 550 , but joining in clubs , sports , music , and other activities at school makes it easier to get to know people in every grade.

The best advice I can give about the years you spend in high school is to learn things for yourself, not just to get a good grade . There have been so many tests that I've prepared for the night before , gotten an A , and not remembered anything later . I've changed that this year , and I enjoy school so much more . Don't take easy classes just to have a simple year . If you have a choice between chemistry and sports, the first will prove to be a lot more useful!

While drinking and smoking might be present in some middle schools , they're also around in high school . I have a lot of friends who promised they'd never drink

or smoke, but are now partying every weekend. If you have "fun" and spend your nights wasted instead of studying, you will regret it when you're applying for (申请) college. The "friends" who say you're a loser for not partying are really not your friends at all. It's hard to see your closest friends grow apart and go in different directions, but don't follow their footsteps. Create your own path in life and make your own decisions.

1. What happened to the author on his first day of high school?

- A. He had a fight with an eleventh-grader.
- B. He fell into a pool on the fourth floor.
- C. He was five minutes late for class.

D. He was fooled by a schoolboy.

2. The author advises high school students to _____.

- A. choose useful classes
- B. give up sports
- C. try their best to get good grades
- D. get ready for tests the night before

3. The last paragraph mainly tells us _____.

- A. not to lose ourselves in high school
- B. about the importance of making friends
- C. not to go to any party in high school
- D. about the trouble caused by drinking and smoking.

七选五(本题共5小题, 每小题2分, 共10分)

根据短文内容，从短文后的选项中选出能填入空白处的最佳选项。选项中有两项为多余选项。 _

The millipede (千足虫)_

Forest life_

61. We enjoy watching television programs about bears, bats or monkeys. We knew a lot about their lives: how they find food or what they do at different times of the year. But what about smaller animals that are more difficult to see or film?_

62. A French scientist, Francois-Xavier, Joly, is studying one of them — the millipede._

The importance of leaves_

When leaves begin to die in autumn, they turn from green to yellow and fall from the trees._

63. **Life in the forest needs these nutrients**— without them, plants could not grow and so there would be no food for other animals._

Food on the forest floor_

Some living things, like mushrooms, break the leaves into smaller pieces and eat them. In a few months there is nothing left of them. But for mushrooms, not all trees are the same. Mushrooms prefer some types of leaves to others. This means that some leaves take much longer to break down than others, sometimes years. So what happens to these? 64._

More on the menu_

The millipede also likes leaves and it eats any type. But when it has finished, it produces waste. This waste then becomes the food of mushrooms. When

mushrooms eat leaves they choose only certain types — But when they eat waste, they will eat any kind. 65.—

So next time you are walking through a forest, remember that something may be having a meal right under your feet!—

A. This is where the millipede can help.—

B. However, not all leaves are equally rich.—

C. Millipedes do amazing things in the soil in our forests.—

D. Forests are amazing places, and so are the animals that live in them.—

E.As they break down on the ground, nutrients are returned to the soil.—

F.Many small animals that live in forests are very important for the soil.—

G.This is how the millipede turns dead leaves into food for others and helps life continue.—

D F E A G

用单词的适当形式完成短文。

My name is Han Jing who is not 56. an outgoing girl. This is my first senior school day and I am so 57. anxious (anxiety). I was wondering whether I could make a good first 58. impression (impress) and make any good 59. friends (friend).

In my first maths class, difficult as it was, the teacher was humorous and

60. helpful (help) who even told us a funny story, 61. which made us laugh heartily..

In the afternoon, we had our chemistry class in the school lab, 62. which is new and the lesson was great..

What a day! In the morning, I was 63. worried (worry) about my new life. However, now, I don't feel awkward or 64. frightened (frighten) at all. I firmly believe I can make new friends and I am confident tomorrow is another great day! I can't wait 65. to explore (explore) more about my new life!
